

Quality Policy (Australian ISO9001 sites)

EDL is a leading provider of sustainable and innovative energy and environmental solutions in Australia. EDL's Australian business focus includes:

- Remote Energy
- Waste Coal Mine Gas Power Generation and Abatement
- Landfill Gas Power Generation and Abatement.

This Quality Policy has the following objectives:

- EDL will maintain a quality management system to meet requirements of ISO 9001 for those EDL Australian Sites that are ISO 9001 accredited
- EDL will aim to comply with applicable legal and other business obligations for the activities it performs
- EDL will seek to continually improve the quality management system through periodic management reviews
- EDL will establish and review corporate objectives relevant to the quality management system.

This Quality Policy will be communicated within the organisation through the corporate intranet and internal awareness. It will be periodically reviewed to ensure continuing suitability.

James Harman, Chief Executive Officer

Issued: February 2017 (Review Date: February 2018)

Scope: this policy applies to the Australian sites as outlined in the ISO9001 scope of accreditation.
